# A SHARED VISION

## The 10 Point Plan to Finance Biodiversity

### PRINCIPLES FOR ACTION

1. **Comprehensive Package Deal**
   - We commit to work together towards a comprehensive package of actions on biodiversity finance from all sources.

2. **Greening Financial Systems**
   - We commit to align financial systems and our economies with pathways to become climate neutral, nature-positive, resilient and less-polluting.

3. **Financing Sustainable and Nature-Positive Actions**
   - We commit to work together and with others to finance actions to close the biodiversity finance gap.

4. **Fostering Synergies in Environmental Finance**
   - We recognize that we face several interrelated environmental crises including climate change, biodiversity loss, desertification, and pollution.

5. **Just Transition**
   - We commit to ensuring a just, equitable, and progressive transition to an economy that delivers benefits to all people.

### ACTIONS

1. **International Financial Flows**
   - Increase international finance, commensurate with ambition

2. **Synergies with Climate Finance**
   - Dedicate a significant proportion of their climate finance for nature

3. **Harmful Subsidies**
   - Review national subsidies to redirect or eliminate all subsidies and incentives harmful to biodiversity and scale up nature-positive incentives

4. **Domestic Resource Mobilization**
   - Use financial and policy levers to mobilize more biodiversity finance domestically

5. **Private Sector Alignment**
   - Develop policies to align financial flows so businesses reduce negative and increase positive impacts

6. **Philanthropy**
   - Encourage further contributions from the philanthropic sector

7. **Multilateral Development Banks (MDBs) and International Financial Institutions (IFIs)**
   - Call on MDBs and IFIs to pledge additional funds for biodiversity and to align their portfolios with the Global Biodiversity Framework

8. **Access to Funds**
   - Ensure multilateral and bilateral funding agencies and mechanisms accelerate, simplify and streamline access to financial resources

9. **International Monetary Fund**
   - Encourage the IMF to provide support on conservation and sustainable use of biodiversity and on climate adaptation and mitigation

10. **Partnerships**
    - Work together with all sectors and all levels of society to facilitate implementation of the Global Biodiversity Framework
