Clean energy tax credits support jobs and the economy in Pennsylvania

People around the country are benefiting from the 2022 clean energy tax credits. To quantify those benefits, TNC partnered with BW Research to model the economic impacts of the tax credits from 2025 to 2032. In this analysis we grouped the tax credits by sector: power, industry, buildings and transportation.

This research shows that clean energy is critical to supporting American jobs and the economy. Congress needs to maintain these tax credits so that they can continue to deliver for our state and our environment.

In Pennsylvania from now to 2032, the clean energy tax credits will:

Jobs

12,500

Support more than 12,500 jobs annually

GSF

\$1.5B

Support nearly \$1.5 billion in annual economic value added

Wages

\$729.3M

Generate over \$729.3 million in household income annually

Tax Revenue

\$179.5M

Yield more than \$179.5 million in local, state and federal tax revenue annually

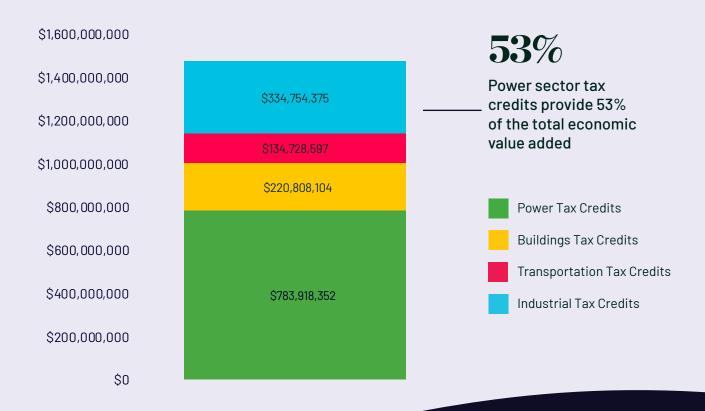

RO

\$1.82

Provide a return of \$1.82 for each federal dollar invested

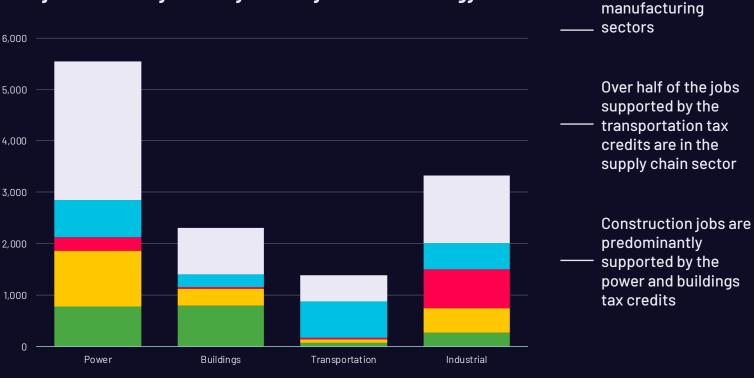

Average economic value added in Pennsylvania by clean energy tax credits
