

# **Trail Access**

• The 1.5 mile, round trip trail includes a boardwalk, from which you will pass several fens that feature a number of unusual plant species such as northern bayberry, poison sumac, tamarack, large cranberry and round-leaved sundew. Past the boardwalk, an earthen trail continues, looping through a beech-maple forest. This forest grows on a hill of sand and gravel, known as a Kame, that was deposited as the glaciers retreated during the last ice age.

### Hours and Use

- Trail open dawn to dusk
- For your safety, please be aware of any posted rules & notices
- In order to protect the sensitive species, and for your safety, please stay on the boardwalk and trails

#### **Travel** Directions

- From Streetsboro: Travel State Route 43 south for 0.2 miles from its intersection with State Route 14. Turn right (southwest) on Seasons Road. Follow Seasons Road 2.2 miles to a gravel lane on the left (east) side just past a railroad crossing. Gravel parking lot on right
- GPS coordinates: 41.21404064840986, -81.37116157908415

## Site Overview

J. Arthur Herrick Fen Preserve is one of the last remaining boreal fens in Ohio. A fen is a wetland characterized by cold, alkaline, mineral rich springs and spongy layers of organic matter called peat. At Herrick Fen, numerous springs flow from low gravel hills formed by glaciers during the last ice age, 10,000-12,000 years ago. The unusual water chemistry in the springs encourages the growth of sedges and plants more common in more northern climates. The preserve supports tamarack, the only native conifer tree in Ohio that sheds its needles each year, as well as one of only three locations of northern bayberry, a distinctive shrub with waxy white berries. The site is named after Dr. J. Arthur Herrick, an early Conservancy board member, Kent State University professor and avid naturalist. The 140-acre preserve is coowned by The Nature Conservancy and Kent State University, and managed by the Conservancy as a state nature preserve.

Characteristic Species:

sundew

poison sumac

tamarack

large cranberry

The Nature Conservancy is the leading conservation organization in the world. We are an international, nonprofit organization with a mission to preserve the lands and waters on which all life depends. The Nature Conservancy in Ohio was established in 1958 and has helped protect more than 60,000 acres of ecologically significant land and waters. For more information about us and our preserves, please visit **nature.org/ohio** or contact us at:

6375 Riverside Drive, Suite 100, Dublin, Ohio 43017 Telephone: (614) 717-2770 Email: ohio@tnc.org
