Making Roads Safer for Wildlife

Collisions between wildlife and motor vehicles are a costly and distressing problem. In Wyoming, TNC's Corinna Riginos is using science to find ways to reduce these accidents. Her new report assembles the latest data on collisions and dangerous hotspots and makes recommendations on improving the odds for people and wildlife.

Hope in Action: Jackson

We are counting down the days to our Hope in Action event featuring TNC lead scientist Katharine Hayhoe in Jackson on August 22-23. We've packed the days with lots of opportunities to learn and talk about the critical issue of climate change. Dr. Hayhoe is an inspirational speaker who brings hope at a time when so much of the climate conversation is filled with doom and gloom.

A Quarter Century of Old Bill's

It's hard to believe, but Old Bill's Fun Run marks its 25th anniversary this year. The donations it has garnered through the years have touched lives of people in myriad ways. The giving season runs August 12 – September 16. Once again, we hope you will choose TNC as one of your sponsored charities.

A Historic Opportunity to Address the Climate Crisis

After months of negotiation, Congress is now on the line to pass the single biggest investment to tackle the climate crisis in U.S. history, by far. And we need to make sure it gets across the finish line.

We urge you to send your message to your Senators and Representative now. Call on your elected leaders to support bold funding and policies we need to tackle the climate crisis ASAP.

Now more than ever, we need to put real, concrete action behind U.S. promises to combat the climate crisis.

Restoration Through Tradition in Hawai'i

For a Native Hawaiian scientist, the key to restoring coral is in restoring culture. Working with elders, he's reviving a tradition that uses taro farms and fish ponds to filter water throughout the ecosystem while sustainably growing healthy food.

Shifting the Tide

A culture of strict gender roles is slowly shifting in the Solomon Islands, where women for the first time have joined the ranks as conservation rangers. The women are collecting data to protect endangered sea turtles, breaking preconceptions one patrol at a time.

Gabon Is Leading the Way

Gabon, determined to protecting 30% of its natural habitats by 2030, is emerging as a conservation leader in Africa and globally. TNC has partnered in Gabon for 9 years and hopes to be a catalyst for durable conservation that benefits people locally.

PHOTO OF THE MONTH

FLUTTER SPEED MEETS SHUTTER SPEED Monarch butterflies fill the air around the mountaintops in the Monarch Butterfly Biosphere Reserve, a UNESCO World Heritage Site in Michoacán, Mexico. © Luz Angela Velazquez /TNC Photo Contest 2021

The migratory monarch butterfly, a subspecies of the monarch butterfly, was recently added to the IUCN's Red List as an endangered species, due to pressures from habitat loss and climate change.

There are only 11-14 mountaintops left in Mexico where these butterflies can find a safe haven to wait out the harsh winters in temperate climates.
