Little St. Simons Island

DATES

May 7 - 13, 2021

PRICE

Double Occupancy: \$3,070

Single Occupancy: \$5,065

DAY-BY-DAY ITINERARY

The Nature Conservancy is working with the owners and staff of Little St. Simons to ensure the beaches, forests and salt marshes remain healthy and continue to flourish as an important part of the South Atlantic coastal region—an area that supports one of the East Coast's most prosperous commercial and recreational fisheries. The Conservancy holds a conservation easement on LSSI and works closely with the LSSI ecological manager and other staff to recommend best management practices and to determine research and monitoring priorities, putting conservation of the island's habitats and species first. Please join us for a special week exploring this pristine, protected area. Thank you for your interest travelling with The Nature Conservancy.

The Conservancy long ago made the Altamaha River a focus of its freshwater and coastal conservation work, purchasing its first parcels in the watershed in the late 1960s – two small islands that are formed from the sediment and sand the river washes downstream. The Conservancy's long commitment to the Altamaha and coast has become a testing ground for a bold new conservation strategy of protecting entire landscapes and ecosystems. The Conservancy has protected more than 280 miles of ecologically important lands within the watershed, including creating a more than 50-mile contiguous corridor of conserved lands all the way out to coastal barrier islands. By increasing coastal resilience, The Nature Conservancy aims to reduce the current and growing risks to coastal communities from natural hazards and climate change through the use of natural solutions and smart development.

TNC TRAVEL VALUES

ACCESS:

Travel with renowned Conservancy experts and local partners for an exclusive, behind-the-scenes experience. You won't just see amazing places, you'll see how you are helping save them.

IMPACT:

See how your commitment to our planet and your passion for conservation are making a difference. You will see the wild places and the communities you are impacting.

KNOWLEDGE:

Learn how we are applying the latest cutting-edge science to affect global change and drive conservation.

INSPIRATION:

Immerse yourself in local cultures and awe-inspiring landscapes to foster your own connection to our world.

GLOBALLY MINDED:

Elevate your understanding of our work by seeing first-hand how TNC and our partners act locally and how we turn local results in to global impact by scaling solutions that work.

PROGRAM HIGHLIGHTS

NATURALISTS

Spend your days learning from the naturalists who live and work on Little St. Simons Island.

PRISTINE BEACHES

Whether you're walking, biking, or birding, enjoy the miles of untouched coastline, populated by only you and your fellow travelers.

BIRDING

Little St. Simons Island has both viewing towers and blinds from which to watch egrets, herons, roseate spoonbills and more!

Your trip supports the local communities you're traveling in and The Nature Conservancy's efforts locally and globally. This trip has been planned specifically by The Nature Conservancy's team of scientific experts and travel liaisons to immerse you in the work the Conservancy is doing on the ground that has global consequences.

THE CONSERVATION LANDSCAPE

THE ALTAMAHA RIVER

With more than 7,400 miles of shoreline, the Georgia coast is among the world's most naturally diverse and intact coastal habitats. With sandy beaches, acres of maritime forests and nearly one-third of all the salt marshes in the eastern United States, more than 55,000 resident and migratory shorebirds and seabirds use the Georgia coast each year.

The Altamaha River Delta – a 135-square mile area beginning at the Southern tip of Sapelo Island and extending south to encompass Wolf, Egg, Little Egg and Little St. Simons islands in McIntosh and Glynn counties – is among the most noted Georgia habitats for seabirds and shorebirds, including the American oystercatcher. From the loggerhead sea turtle to the shortnose sturgeon, from the northern right whale to the blue crab, species of all shapes and sizes benefit from Georgia's robust coastal estuaries.

In 1999, the Mexico-based Western Hemisphere Shorebird Reserve Network recognized the Altamaha River Delta as the 40th major reserve for shorebirds. The National Audubon Society has designated the delta as one of the country's top 500 Important Birding Areas.

Our work in this region is contributing to our global goal of safeguarding 60,000 miles of the world's most precious sources of fresh water. As the global population soars, demands for food, energy and shelter are putting unprecedented pressure on our planet – and water is at the heart of this crisis. The Nature Conservancy's plan is to fundamentally change the way our most precious resource – water – is used and managed so that nature and people can thrive together.

ITINERARY

DAY 1 – May 7 | Please plan to arrive at the Jacksonville International Airport by 12:00 pm. You will be driven as a group to the Hampton River Marina, which is approximately 1.5 hours away. The boat from the marina to Little St. Simons Island will depart at 2:00pm. On the boat ride, you will get the chance to cruise through coastal Georgia salt marshes; keep an eye out for wildlife!

After settling into your rooms, we will congregate at 6:00 pm for a social hour, during which you can meet your fellow travelers and your hosts. Enjoy local Georgia shrimp on the Lodge's patio and relax in the shade of ancient mossdraped oaks. The Lodge's chef will have dinner prepared by 7:00 pm and we will move to the dining room. At 8:15 pm, you will learn more about the ecology of the surrounding area and what you can expect for the week ahead.

OVERNIGHT AT LSSI

DAY 2 – May 8 | Early in the morning, a continental breakfast will be available for those who wish to grab a quick bite and head out on their own. At 7:15 am, a morning birding excursion will be available and will return to the Lodge in time for breakfast with the group. At the 9:00 am group breakfast, a naturalist will explain the activity options for the day and will be available to answer any questions you may have. Please note that anyone who wishes to use a skiff **MUST** attend a boat class. We will hold a social hour at 6:00 pm, and dinner at 7:00 pm.

OVERNIGHT AT LSSI

DAYS 3, 4, 5, 6 – May 9 - 12 | Each of these days will mirror day 2, with a morning and an afternoon activity and all meals together with the group. Examples of possible activities are below.

POSSIBLE ACTIVITY DESCRIPTIONS

- North End Adventure: Enjoy a guided informative truck trip up island to learn about the island's cultural and natural history.
- Hikes: Embark on a guided hike from the Lodge along the trails and see the flora and fauna with an island naturalist. Island hiking is easy.
- Creek Paddling: Explore the tidal salt marshes surrounding Little St. Simons Island by kayak or canoe. After a quick refresher on paddling technique, your naturalist will guide you on a leisurely trip through this remarkable habitat. You'll see birds and other wildlife you wouldn't be able to see from the trails.

LODGING

THE LODGE AT LITTLE ST. SIMONS

The Lodge is a collection of cabins with shared kitchen and living room spaces plus rooms in the main lodge itself. Everything is in within easy walking distance of the main lodge where you'll have meals.

ITINERARY, CONT.

- **Creek Fishing:** See what's biting in the tidal creeks or in the surf; the Lodge provides spin gear and fly rods, bait and artificial lures for a variety of species including redfish, flounder or trout.
- **Reptile-Amphibian Safari:** Enjoy a guided truck excursion to a variety of habitats in search of native reptiles and amphibians.
- **South End Adventure:** Go on a truck adventure to Little St. Simons Island's south end, where Slash and Loblolly pine trees tower. You will learn why the pine forest habitat exists and how fires play an important role in plant succession on the island.
- **Birding at Myrtle Pond:** Join a naturalist on a truck excursion to the viewing towers and blinds at Myrtle Pond. We will expect to see least bitterns, glossy ibis, black necked stilts and yellowlegs to name a few.
- **Shorebirding Sancho Panza Beach:** Join one of our naturalists for a shorebirding excursion on the northeast reaches of Little St. Simons Island.
- **Bike Adventure:** Learn more of the flora and fauna on a guided bike adventure with an island naturalist. You might spot armadillos or a variety of resident and migratory birds along the way. Or join a naturalist for a perspective of how the cultural history has shaped the natural history of Little St. Simons Island.
- **Boat Tour on Nearby Waterways:** Join a few local experts on a boat-based excursion through tidal creeks and salt marsh habitat.
- **Garden Walk:** Enjoy a guided walk through our Organic Garden and learn about the herbs, vegetables, flowers, fruits, cover crops and compost.
- **Pond Adventure:** Take a tour of the natural freshwater ponds around the island that harbor an abundance of American alligators and wading birds such as herons and egrets.
- If you are seeking a quieter afternoon, simply relax on the banks of Mosquito Creek under a live oak with a good book.

DAY 7 - May 13 | We hope that you have enjoyed your stay on Little St. Simons Island, and will return home with many memories! After breakfast, the boat between the island and the marina will depart at 10:00 am. As a group, you will be driven from the marina to the Jacksonville International Airport to catch your flight home, or to your next destination.

PLEASE NOTE: This itinerary is representative of your trip, and like all-natural history excursions, activities are subject to modification based on weather, tides and unforeseen events and the lodge will be working to confirm the exact itinerary much closer to departure when some of the unknown factors can be estimated. We will do our best to keep you informed on any necessary changes.

When considering whether this trip is right for you, look closely at the itinerary and consider your ability level. Travelers should be able to walk as much as a mile or two over uneven terrain and get in and out of trucks and boats in order to participate in all activities. With this departure, travelers not wishing to participate in certain events can always opt to spend a day or half the day at the lodge on their own relaxing, reading or watching birds from the porch. Expect to spend 4 to 8 hours outdoors most days. A range of weather conditions may be possible on this trip. Please pay special attention to the trip materials and pack accordingly.

PRICE DETAIL

Double Occupancy \$3,070

Single Occupancy: \$5,065

Price **includes** all lodging, transportation to and from the Lodge at LSSI, activities, tips, meals, TNC expert staff and local guides. Price does **not include** your roundtrip flight to Jacksonville-
